- Car and truck batteries _____
- Polish and wax _____
- Motor oil _____
- Tires _____
- Transmission fluid _____

LAWN AND GARDEN

- Fungicides _____
- Herbicides _____
- Insect repellents _____
- Pesticides _____

What Should You Do With HHW Waste Products?

1. **Identify them.** Look for the following words and phrases on the label – they mean the product may be harmful to people, animals and the environment:

• Caustic	• Harmful if swallowed
• Caution	• Poison
• Contains phosphates	• Reactive
• Corrosive	• Skin irritant
• Danger	• Toxic
• Do not mix	• Volatile
• Eye irritant	• Warning
• Flammable	• Wear rubber gloves

2. **Follow directions.** Always read labels and follow directions carefully.

3. **Store in a cool, dry place.** Between collection events or trips to the recycling center, keep all hazardous products in their original containers with lids fastened securely. Do not mix, combine or consolidate them.

4. **Recycle or take to a designated collection site.** Never place hazardous products in your regular trash. Motor oil, brake and transmission fluid, antifreeze and car batteries can be recycled at most service stations.

5. **Use environmentally safe products.** Use latex paints instead of oil-based paints. Look for the following words on the product label:
 - Biodegradable
 - Contains no phosphorus
 - Environmentally safe
 - Non-corrosive
 - Nontoxic

6. **Don't let products go to waste.** Buy only what is needed to do the job. If you can't use all of a product, pass it on to a neighbor, friend or community organization that can.

More Info

For more information on proper disposal of hazardous materials and where to take items not being accepted at this event go to www.tceq.texas.gov and use the search feature.
