

CAUTION

SUBMERGED

ROCKS

AND

DEBRIS

To ALL Citizens or Users of Our Facilities.

Due to the major flood that occurred in 2018 there have been some changes around our boat ramp on Lake Marble Falls..

There are some submerged rocks that have been there for years and some additional ones that were left in various areas after the flooding, east of the ramp.

Another major change straight out from our boat ramp is a sand bar that can damage props or even boats.

Please use caution when launching your boat or personal watercraft.

REMEMBER— Safety is the main Goal.
